

# KATANA IP

LINEAR PROFILE

**senso**  
by luminii

**Katana IP - IP68 and IK10 Rated Linear LED Lighting.** The Katana IP is designed for applications where your space is exposed to wet conditions. Our LED encapsulation process ensures a long lasting, vandal resistant seal with hard resin. With many options available, it is highly modular, versatile and easy to install.

## Resin & Profile Features

### Top Layer

The top resin layer of the IP rated Katana acts as the lens and first line of defense for the LED.

#### Soft cured resin:

Outdoor resistant against rain, snow and direct sunlight as well as intense conditions like hail and acid rain. The resin is also thermal resistant against thermal cycles and drastic changes in temperature. Chemicals like detergents or disinfectants will not deteriorate, disintegrate or discolor the soft resin.

#### Hard cured resin:

The hard cured resin maintains all of the same outdoor resistant features as the soft, but acquires extra physical resistance as well. Abrasion resistance will keep the resin intact even after wear, impact or high levels of pressure are applied. It will prevent vandalism and resist fire and ignition. The hard resin allows any profile to be floor mounted.

### Fill Layer

The fill layer of the IP rated Katana main purpose is to fully encapsulate and protect the LED strip. This fully sealed layer is able to maintain light quality without any color shift. The fill layer will not yellow over time and will keep perfect CRI and color- consistency over the lifespan of the LED.

### Mounting Options

The Katana profile has a built-in channels for attaching mounting clips suitable for outdoor installation. See page 3 for details.

### Aluminum Extrusion

Katana, along with all our profile fixtures, are made of anodized aluminum. This allows our profile to be as thin as possible while maintaining rigidity, limiting flex over long runs.

## Top Layer Finish

### Frosted Resin

The frosted resin top layer is available in both hard and soft options and offers a soft diffused light.

### Clear Resin

The clear resin top layer is the best option for maximum light efficiency. Low light loss allows you to get the most out of each LED.

## Construction

- High quality poured resin lens
- Hard, soft, clear and frosted resin options
- Housing: Aluminum extrusion

## Installation

- Factory assembled for easy and fast installation
- Electrical wire included

## Dimensions

## Joining Sections

- Typical 2" jumper on runs over 8'

- Seamless profile with back fed jumper

## Flush Mount Clip

part number **555-815-20**

- Steel construction
- Profile is mounted flush to surface
- Not visible once installed

## Feed Points

End Fed

Back Fed

## Universal Power Supply 1% 120VAC - 277VAC

Universal Power Supply 1% 120VAC - 277VAC

MODEL	POWER	OUTPUT
PDCU-D - IP20 Dry Series	30 - 30 W 60 - 60 W 96 - 96 W	24 - 24 VDC

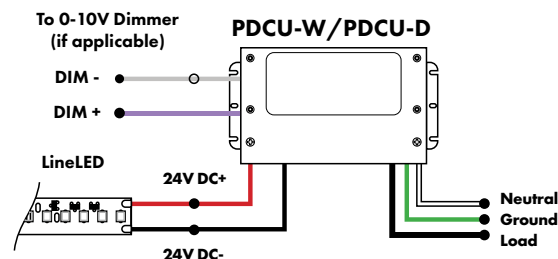

PDCU-W - IP66 Wet Series 96 - 96 W
