Concealed Bracket Installation

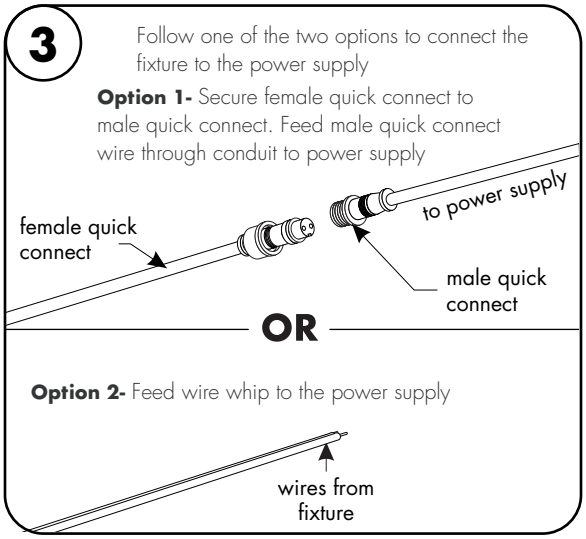

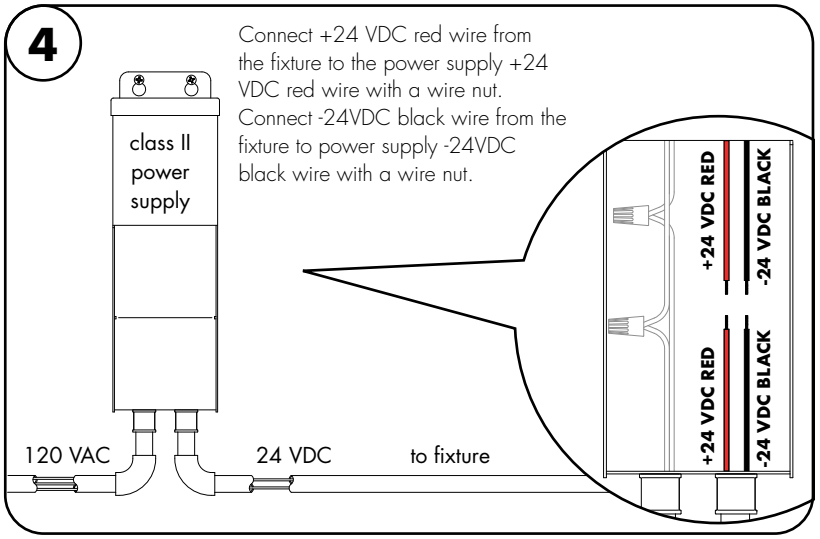

1.1 Determine the location of where the fixture(s) will be installed. Lay the fixture(s) on the surface, and make any necessary reference marks for the fixed mounting clips (or if using the fixed 45° degree mounting clip). Make marks 4" from each end of the fixture(s) and also every 24" in between.

1.2 Lay the fixed clip onto the reference mark points and secure using the provided hardware.

2.1 If necessary make any pass through holes for wire lead/connector to the surface, depending on the power feed option. Then snap the fixture into the concealed mounting bracket to secure in place.

Adjustable Hinge Installation

1

1.1 Slightly loosen both screws on the sides of the hinge bracket. Rotate the fixture to expose mounting hole.

2

Note: : Prior to installation all 24VDC wires must be present near fixture. Refer to the power supply installation instruction for additional information.
Note: More than one person is recommended for this installation.

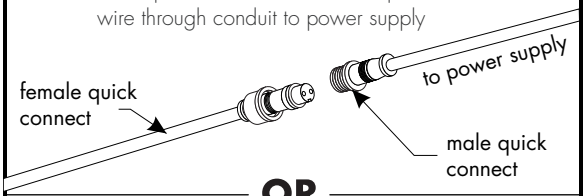

2.1 Determine the location of the fixture. Then secure the fixture to the surface using the provided mounting screws.

2.2 Rotate the fixture to the desired angle then tighten the side screws to secure.

3

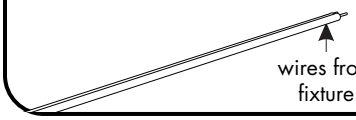

Follow one of the two options to connect the fixture to the power supply

Option 1- Secure female quick connect to male quick connect. Feed male quick connect wire through conduit to power supply

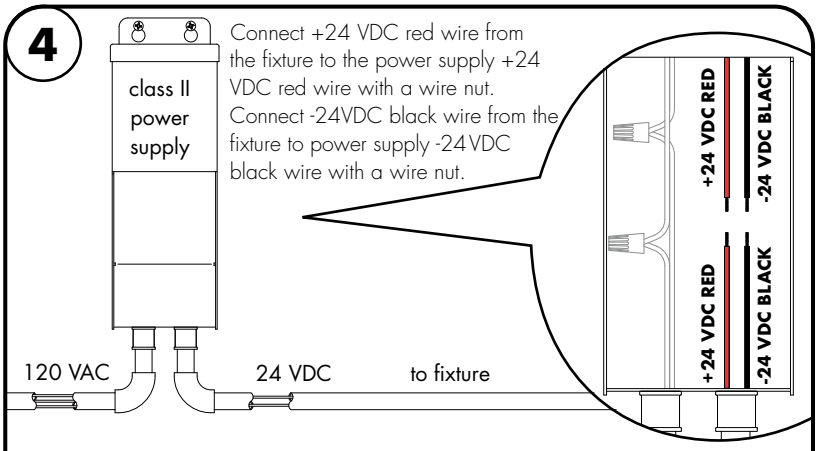

OR

Option 2- Feed wire whip to the power supply

4
